## EVENT SAFETY RULES

Your safety is our most important concern. Please follow these instructions:

- Loaded firearms should NEVER be brought to or from the firing line. Empty chamber indicators (ECIs) are to be inserted at all times when a firearm is uncased.
- Any competitor witnessing an unsafe act that creates an imminent danger should immediately call a cease fire, using the commands, "Cease Fire: Unload!"
- During pit changes, competitors remaining on the line ARE allowed to leave their rifle on the firing point with ECIs inserted, but the firing line is to be cleared of all personnel.
- It gets hot at Ben Avery. We encourage you to bring personal cover such as EZ-Ups, tents, and umbrellas. Be sure to place this gear well behind the firing line. Remember, this type of equipment is not allowed on the firing line proper.
- Extra water is usually available on the firing line and in the pits: stay hydrated.
- Impact-resistant glasses, a brimmed hat, and ear plugs are MANDATORY on the firing line and in the pits during live fire. We have spare plugs and glasses if you need them. UV radiation is the biggest danger to your eyes. Eye protection is mandatory for all these reasons.
- Solid core bullets and muzzle brakes are not allowed.
- No one is to leave the catwalk during live fire periods.
- When the pits are sealed, all access road gates will be closed and a red range flag will be displayed at the center of the firing line. No one is to move forward of the firing line or from the pits during this time.
- When going to and from the pits, the last car through should close the access gates at the 1000 yard line.
- In the pits, all vehicles should be parked at least 5 firing points away from active targets.
- Keep your vehicle speed below 15 MPH when driving to and from the pits.
- Finally, please show courtesy to fellow competitors by taking your chit-chat off the firing line. Also, consider leaving your gear on line until after the competitors next to you have finished.
